***Campbellford Memorial Hospital Hosts Seniors Appreciation Day June 20, 2014***

**News:**

Campbellford Memorial Hospital hosted a Seniors Appreciation Day on June 20, 2014 from 9:00 a.m. until 2:00 p.m. The hospital invited a variety of community partners and service providers to share information and host demonstrations of interest to area seniors and their caregivers. A variety of professionals and community partners were on-site including:

- Island Park Retirement Community
- Barb Christie, an expert on downsizing and transitioning from Home to Retirement Home
- Community Care Access Centre
- Family Health Team
- Multicare Lodge
- Campbellford Memorial Hospital Foundation

Presentations were offered every 30 minutes (from 9:00 – 11:30 a.m.) on Power of Attorney, Substitute Decision-Making and Advanced Planning. Tai Chi and Reiki mini classes were offered every 30 minutes. Experts also spoke to seniors about medication management, diet and nutrition, falls prevention, the importance of immunization, and blood sugar testing.

June 2014 marks the 30<sup>th</sup> anniversary of Seniors' Month. This year's theme is **Aging Without Boundaries: 30 Years of Celebrating Seniors**. The theme recognizes the contributions seniors have made to their community and the contributions they are still making every day across Ontario.

**QUOTES:**

"We are focused on making Campbellford Memorial Hospital a senior friendly hospital and we have considerable experience delivering care to older adults. Our Seniors Appreciation Day was a great opportunity to partner with other community agencies and individuals to encourage wellness and prevention for seniors and their caregivers." Brad Hilker, President and CEO, Campbellford Memorial Hospital

**QUICK FACTS:**

- Campbellford Memorial Hospital is one of nine hospitals in the Central East LHIN working together to improve the health and well-being, as well as the care experience, of seniors while in the hospital as part of a Senior Friendly Initiatives project of Seniors Care Network. Care seniors receive while in a hospital, and the hospital experience itself, can impact their health and well-being. The Working Group is focused on improving seniors' health and well-being by

# Preserving

taking steps to reduce the possibility of physical and mental decline while receiving care in hospital. A senior friendly hospital is one in which the environment, organizational culture, and ways of care-giving accommodate and respond to seniors' physical and cognitive needs, promote good health (e.g. nutrition and functional activity), maximize safety (e.g. preventing adverse events like a fall), and involve patients – along with families and caregivers – to be full participants in their care. The aim is to enable seniors to maintain optimal health while they are hospitalized so that they can return home or transition to the next level of care that best meets their needs.

- Campbellford Memorial Hospital uses assessment tools like the Barthel Tool for Functional Decline to ensure elderly patients at risk of falling get the most appropriate care.
- The hospital is partnering with Peterborough Regional Health Centre to offer area patients access to the Geriatric Assessment and Intervention Network (GAIN). A program of Seniors Care Network, GAIN teams provide specialized care to support frail older adults living at home, including retirement residences with multiple complex medical problems including cognitive impairment, decreased function, falls or risk of falls, impaired mobility, incontinence and /or multiple medications. Frail older adults experiencing changes in support needs, safety concerns, psychological and mental health concerns or frequent health service usage will benefit from the services offered by their local GAIN team.
- CMH launched its Restorative Care program in 2012, thanks to funding received from the Central East LHIN in 2011. Our Assess and Restore Program includes specially trained nurses, physiotherapists, and a recreational therapist. The hospital is partnering with Central East Community Care Access Centre and Community Care Northumberland to ensure that patients are linked to services in the community to support their return home.
- CMH is a participant in the Home First initiative. Home First is a proven and effective model of care that is being delivered in hospitals across Ontario. Studies have shown that extended periods of time in hospital can have significant negative consequences on patients. The primary objective for the successful implementation of the Home First philosophy is to create conditions which allow patients to be returned to their community. Our Discharge Team includes a pharmacist, dietician, Community Care Access Centre representative, and a physiotherapist to ensure patients and their families have the documents and support they need including medication management, dietary counseling, community support and daily activity to transition safely from hospital to home and reduce hospital readmission. Early engagement ensures that the patient and family will have the best opportunity to be active participants in the discharge planning process.
