

Position: Polysomnographic Technologist
Job Status: Full Time / Part Time
Experience: At least 1 year of experience within healthcare
Location: Campbellford Memorial Hospital (full-time/part-time)

We are seeking a dedicated and skilled Polysomnographic Technologist to join our healthcare team. In this role, you will be responsible for conducting sleep studies and monitoring patients during their sleep cycles to diagnose sleep disorders. Your expertise will contribute significantly to improving patient health and quality of life.

REQUIREMENTS:

- Allied college/university degree preferred (e.g., life sciences, psychology, etc.) or successful completion of a polysomnography program
- Previous experience as a Polysomnographic Technologist is an asset but not essential as training will be provided if required
- Knowledge and expertise with computerized sleep testing systems; knowledge of Alice 6 equipment and Sleepware G3 software is an asset
- Registered Respiratory Therapist (RRT) certification is an asset, but not necessary
- Excellent interpersonal and communication skills, proven problem solving and organizational skills
- Certification in Basic Life Support (CPR/First Aid)

BRIEF JOB DESCRIPTION

- Performing level 1 overnight sleep studies-- patient hook up using a 10/20 system, bio-calibration, artifact recognition, regular overnight observations, equipment disinfection, etc.
- Performing overnight CPAP/BiLevel titration and administering oxygen according to the clinic protocol
- Ensuring patient safety and maintain professional appearance of the clinic
- Equipment cleaning and maintenance required

ADDITIONAL INFORMATION:

- Night Shift (11 hours) with flexible schedule
- Weekend shifts may be required
- Competitive Compensation based on experience
- Paid training for this position will be provided if needed
